ABOUT ME

Experienced Frontend Developer with 12+ years of experience in building scalable enterprise and web applications across healthcare, pharma, AI-powered platforms, automobile dealer management systems, HR, and business domains. Strong expertise in React, Angular, Vue.js, JavaScript, TypeScript, Redux, RTK, responsive dashboards, enterprise admin panels, and modern frontend architecture. Also experienced in Node.js and NestJS, with hands-on involvement in AI-based document learning and conversational platforms featuring intelligent search and LLM-style interactions.

Worked on healthcare and pharma applications including pharmacy management systems, hospital and dental appointment booking platforms, online consultation systems, and real-time video calling features using WebRTC and VideoSDK. Experienced in performance optimization, scalable frontend development, stakeholder collaboration, agile methodologies, and mentoring interns and junior developers across multiple frontend technologies.

SKILLS

Frontend Skills: React, Angular, Vue JS, Next JS, React Native, TypeScript, JavaScript.
Backend Skills: Node JS, NestJS, Express JS, PHP, Laravel, WordPress, Python, REST APIs.
State & Data: Redux, Zustand, MongoDB, MySQL, MSSQL, PostgreSQL.
UI & Components: Kendo UI, Bootstrap UI, Tailwind UI, Materialize US.
AI/ Real Time: WebRTC, Socket, LLM, Ollama,
Development & Collaboration: Git, Jira, Azure, Bitbuket, Gitlab , Claude, Gemini, Github Copilot

WORK EXPERIENCE

Experion Technologies (India) Private Limited | June 2025 - Present

Lead React Developer

Worked on a large-scale Dealer Management System (DMS) for the US automobile industry using React JS, .NET, Kendo UI, Zustand, and Formik. Contributed to enterprise modules including accounting, inventory management, label management, and user management within a complex multi-team environment involving 100+ developers and stakeholders. Focused on scalable frontend development, performance optimization, and enterprise application architecture.

WORK EXPERIENCE

PIT Solutions Pvt. Ltd | February 2025 - May 2025

Senior Frontend Developer (React/Vue JS/ NestJS)

Worked on healthcare and AI-based enterprise applications including a US-based dental and doctor management system built with Next.js and PHP for managing appointments and healthcare workflows. Also contributed to an AI-powered document learning platform similar to notebook-style LLM applications, where users can upload accounting files, resumes, and business documents for intelligent analysis and conversational search. The platform was developed using Vue.js 3 (Nuxt 3), Python, and Tailwind CSS.

Sinergia Media Labs| April 1 2020 - January 2025

Senior Frontend Developer (Angular/ React / Vue JS, Laravel, Express JS)

Worked as an Angular/React/Vue.js/React Native Developer on multiple enterprise healthcare, HR, pharma, and business applications using React, Angular, Vue.js, TypeScript, React Native, .NET, Django, Laravel, and Node.js/Express.js. Contributed to HR analytics and employee tracking systems with dashboards, charts, tables, and reporting features, focusing on responsive UI development, API integration, reusable components, and performance optimization.
Worked on hospital and healthcare management platforms including doctor appointment booking systems, patient mobile applications, and remote consultation solutions with real-time video calling. Developed scalable frontend modules and reusable UI components for pharma and enterprise applications using Vue.js, Angular, and React while collaborating closely with backend teams and stakeholders in agile development environments.
Also contributed to Super5, a fantasy sports platform similar to Dream11, using React Native and Express.js. Worked on mobile application features, API integration, user workflows, and backend services for the fantasy sports platform.
Through additional freelance and project work, gained hands-on experience with Laravel/PHP, WordPress, Node.js, Express.js, and full-stack web application development, including REST API integration and database-driven applications.

Impress AI | May 2018 - January 2020

React JS Developer

Worked on AI-powered chatbot and recruitment automation platforms using React JS, Django, and AI technologies. Developed and maintained chatbot management dashboards with real-time communication using WebSocket/Socket.IO, enabling users to manage chatbot workflows, UI content, conversations, and analytics. Contributed to AI chatbot interfaces, dashboard development, and performance optimization for enterprise-level recruitment and conversational AI applications.

RedPanthers | December 2014 - January 2017

Frontend Developer (Angular, React JS, Meter JS, Vue JS)

Worked as a Frontend Developer on multiple web and hybrid mobile applications using React JS, AngularJS, Vue.js, Meteor JS, Ionic, MEAN stack, Ember.js, Handlebars, and Jasmine testing framework. Contributed to frontend architecture, reusable UI component development, and responsive application design for various business applications. Also gained experience with Laravel and Ruby on Rails through freelance and internal projects.

WORK EXPERIENCE

Codeyssus Labs | January 2014 - Novermber 2014

UI Developer

Worked as a UI Developer on Django-based web applications, including a trade and business platform with real-time chat functionality using WebSocket technology. Developed responsive HTML/CSS interfaces and frontend modules while collaborating closely with backend teams to build interactive and user-friendly web applications.

Independent Consult | January 2014 - Present

Freelance Full Stack/ Web Developer

Delivered web applications and client projects for international and local clients through freelance engagements, working across frontend, backend, CMS and full-stack development.

- Developed and maintained web applications using Laravel, PHP, Node.js, Express.js and NestJS.
- Built responsive frontend applications using JavaScript, TypeScript, Angular, React, Vue.js, Bootstrap, SCSS and Tailwind CSS.
- Developed and customized WordPress themes and plugins, including PSD-to-WordPress implementations, custom post types and WooCommerce customizations.
- Built Laravel applications integrating third-party APIs, including movie data APIs such as OMDb/TMDB, with custom packages, dashboards, theme customization and data visualization.
- Delivered custom websites and business applications for clients across different domains, including restaurant, transportation and content-based websites.
- Handled complete project delivery including requirements analysis, UI development, backend/API development, database integration, debugging, deployment support and client communication.
- Resolved production UI and JavaScript issues, including complex Highcharts, date-picker, CSS and frontend functionality issues.
- Worked directly with clients to understand requirements, estimate work, implement features and deliver projects within agreed timelines.
- Maintained a 5.0/5 rating across 100+ Freelancer.com reviews, demonstrating a sustained history of successful client deliveries.

EDUCATION

FISAT, Ernakulam | June 2008 - May 2012

Electronics and Communication Engineering

Completed B.Tech in Electronics and Communication Engineering with knowledge in electronics, communication systems, computer fundamentals, programming, and engineering sciences.

COURSES

NIIT, Ernakulam | 2012 - 2013

DJVT

Completed a 6-month training program in Java and Oracle technologies, gaining hands-on experience in Java development, Oracle Database, and web application development. Developed an e-commerce application using Java, Bootstrap, and Oracle Database as part of the training program.
